APPLIED ARTIFICIAL INTELLIGENCE

PROFILE

Ph.D. Applied Artificial Intelligence (Industry, Medical)
Operational Technologies Engineer
Infotainment System & Printed Circuit Board Test Engineer

AI developer for industrial and medical anomaly detection
GAN for image reconstruction
Zero False Negative Constraint
SmartCity Hackathon, Ovarian Cancer Challenge

Communication skills

Ambitious, motivated & passionate

French English Spanish

EDUCATION

2020 - 2025

PhD, Artificial Intelligence

UNIVERSITY OF NAMUR

5 years

- Research Activities (HumaLearnLab) :
GenQUAD: GENerative models and QUality constraints for Anomaly Detection: application to industrial and medical images. MidTime Activity with my engineer position.
- Expertise :
Anomaly Detection on computer vision and time series
Unsupervised learning, input reconstruction
Partial AUC for Zero False Negative Constraint
- Publications :
<https://proceedings.mlr.press/v154/bougaham21a.html>
<https://rdcu.be/drBTZ>
<https://www.sciencedirect.com/science/article/pii/S0925231224015339>
<https://arxiv.org/abs/2502.11570>
- Conference Presentation / Keynote :
LIDTA@ECML - Sep 17, 2021
IDA@UCL - Apr 14, 2023
Lecturer UPHF (INSA) - Apr 2023, Apr 2024, Mar 2025
Lecturer UNamur - Mar 2024, Nov 2024, Mar 2025
Lecturer UMons - Mar 2025
Lecturer UMontpellier (IUT + Polytech) - Apr/May 2025
Mardi des Chercheurs - UMons Mar 2024, UPHF Apr 2025
AI Day Béziers - Apr 8, 2025
Meetup GenAI Flint/Epitech - May, 28, 2025

2002 - 2007

Master - MSICT (Electronic & Telecom)

UNIVERSITÉ POLYTECHNIQUE HAUTS-DE-FRANCE
UNIVERSITAT POLITÈCNICA DE CATALUNYA (ERASMUS)

5 years

WORK EXPERIENCE

Operational Technologies Engineer
Research Scientist

2008 -

AISIN EUROPE

AUTOMOTIVE INDUSTRY

• Operational Technology Engineer :

Digital Transformation Actor for efficiency improvement and quality control. Collect, clean & store data to create digital twin processes, build deep learning algorithms for unsupervised anomaly detection. Continuous business analysis activities to reach internal customer satisfaction, and offer a significant impact.

• Automotive Test Engineer :

Test Processes Responsible. Electronical Production applied to Automatic Transmission and Vehicle Infotainment Technology (Audi / VW / Toyota / Opel / Porsche / Lexus / Nvidia).

July 2024

LIRMM (UMONTPPELLIER)

• Research Scientist Intern :

Research and development of medical diagnostic methods based on emission tomography images

2023 -

INSA HDF (UPHF) - UNAMUR -
UMONS - UMONTPPELLIER

• Contract Lecturer :

Teaching (courses + practice) an "AI & Big Data" module, for 1st to 4th year students. Overview of the impact of AI in our lives, fundamental ML/DL models, use cases of industrial and medical issues.

SKILLS

- Data science
- Operational Technologies
- Conference Reviewer (IJCNN, ESANN, ECAI, ...)
- Results-oriented & continuous self-learner
- Autonomous, organised & project-driven
